# how to make an elephant named war

fold diagonally
and lengthwise

fold in the TV folks
to make a diamond

make a paper airplane
on both sides

fold the top of the
diamond down

then fold the tip
back up

hard part...

unfold the diamond, then fold in each side in the opposite direction, using the top portion as the border. do this on both sides.
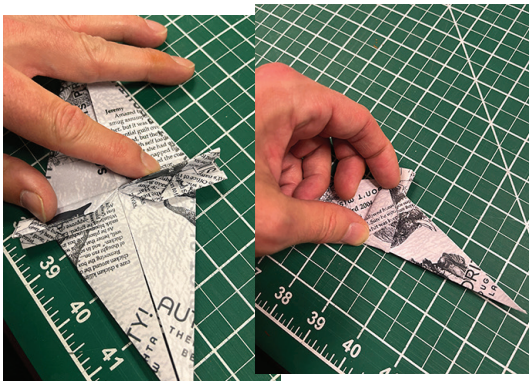

another hard part...

there will be a center piece with a pocket on the outside. open that (on each side) and fold out the new diamond.

yet another hard part...

fold the tips of those new portions on both sides as pictured. it looks kind of like an envelope.
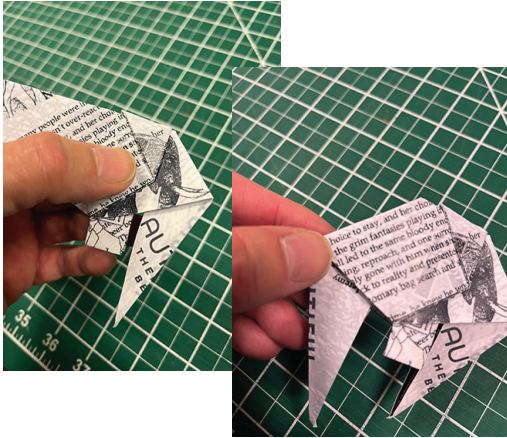

fold both of those side toward the elephant head side of the piece (elephant head is on the other side of the fold).

fold all that stuff in half as pictured.

# how to make an elephant named war

inside reverse fold
the head and the tail

inside reverse fold
again as pictured to
make the butt, then
pull the little tip of
the inner triangle out
to make the tail

inside reverse fold
the trunk again
as pictured to
make the trunk

TA-DAAAAA!!!

hopefully you have
your very own
elephant named war
